

The workshop saw enthusiastic interaction from the participants, here is what they had to say....

"The workshop was very Informative & meticulously designed & executed. This was my second workshop with Videowaves. They have not only covered basics but also updated and educated us about latest in AV technologies.

Kudos to Mr. Kunal Bhatia & his team. Well Done & Keep it up."

- **S. B. Sharma**

Manager Events, Aamby Valley

"Kunal this is an initiative by which you will help a lot of us in the industry. Sessions like this is the need of the hour. You have done this on your own initiative and offered a very enlightening session for all. I strongly recommend a full day paid workshop in future. There was still so much you wanted to share. Congrats once again."

- **Martin DSouza**

Director, Light House World

"The entire session was extremely informative and I saw a lot of efforts in bringing together this highly effective presentation."

- **Zubin Mistry**

Senior Manager- Client Servicing, Colosseum Events

"Thanks Kunalbhai, it's the Videowaves team that defined AV for us when we stepped into the event industry. 16 years of our relationship and still so much to learn from you..."

-**Vicky Nandrajog**

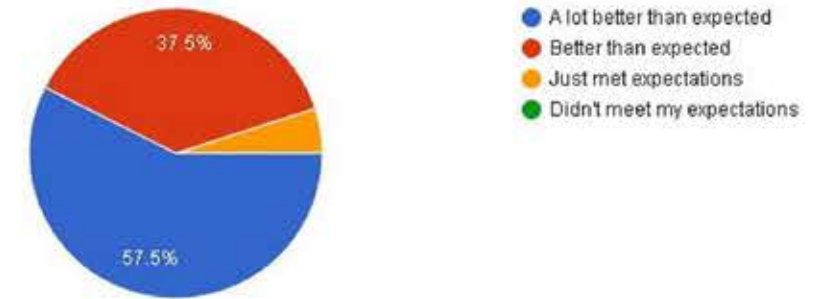

Founder & CEO , Team Back Benchers

"Thank you for amazing learning experience. Thank you for this opportunity to Pravin Madye & the entire Videowaves team."

- **Abhishek Nandedkar**

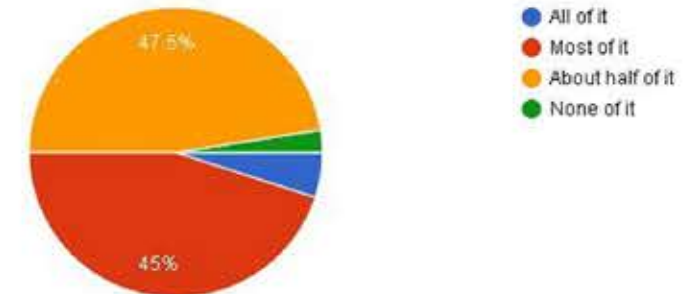

Technical Head, Indore Management Association

3. Was the amount of content shared at the workshop... (40 responses)

Understanding the LED pitch

- Cabinet size 500mm x 500mm
Pixel Resolution 100 pixels x 100 pixels
So pitch size of cabinet will be $500 / 100 = 5\text{mm}$
- Cabinet size 500mm x 500mm
Pixel Resolution 125 pixels x 125 pixels
So pitch size of cabinet will be $500 / 125 = 4\text{mm}$

LED
SCREEN

LED Pitch - 5mm Ratio - 4:3
